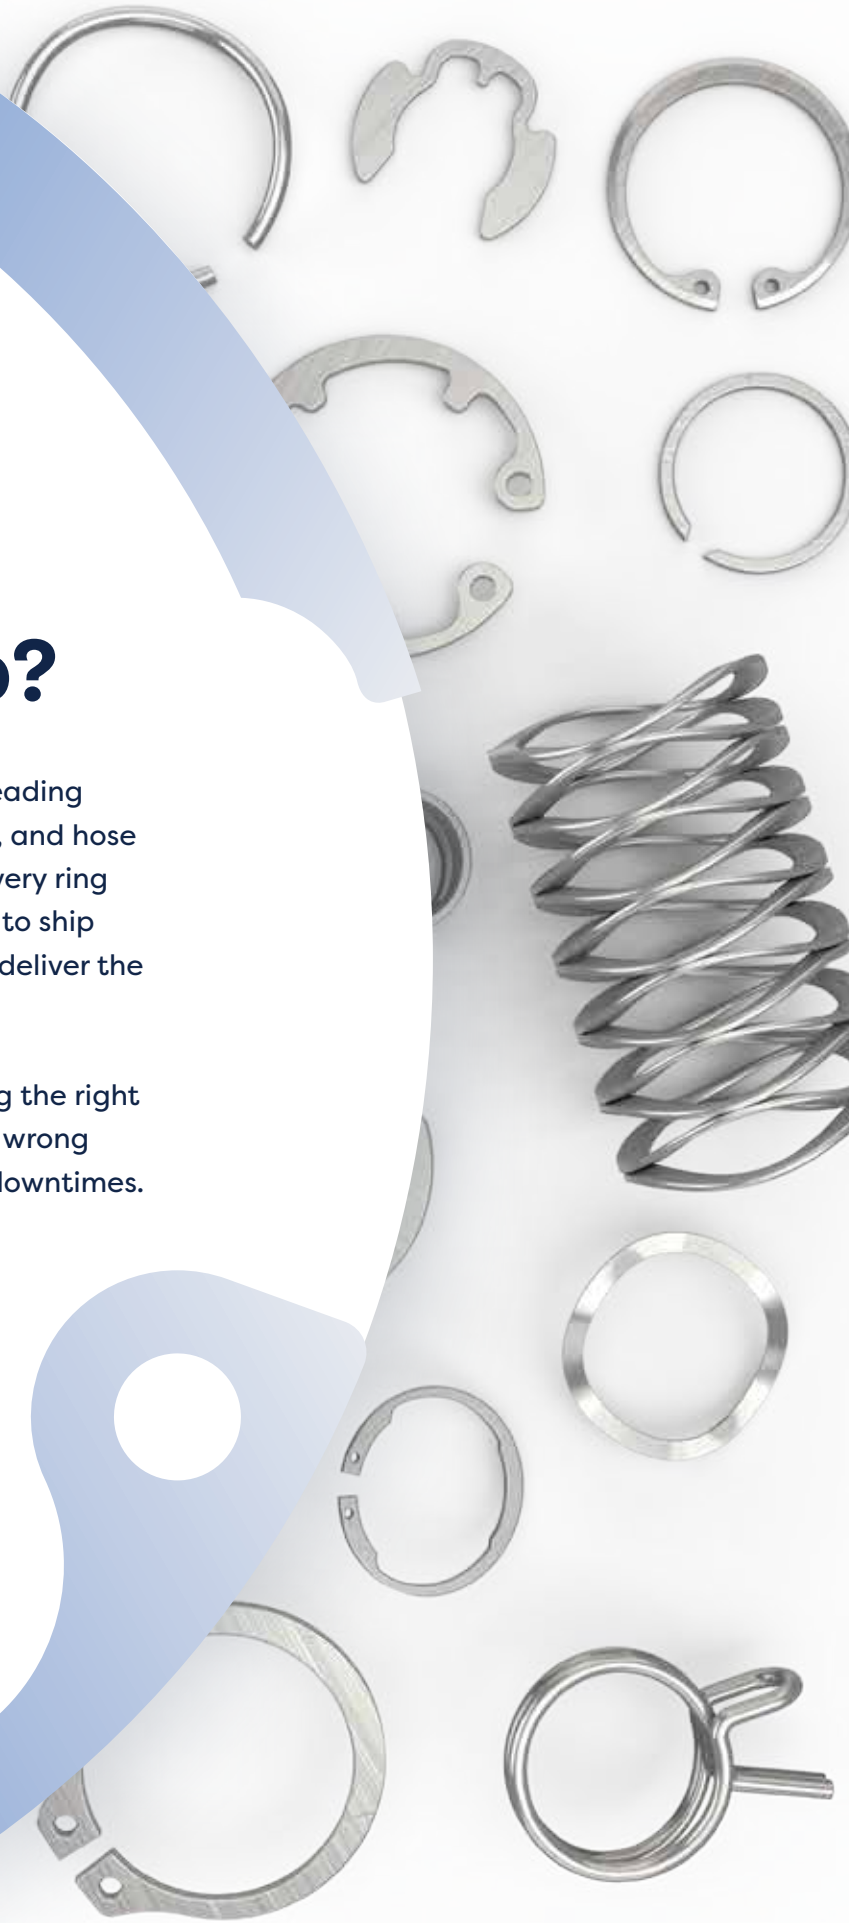
Why Rotor Clip?

For nearly 70 years, Rotor Clip has been the leading manufacturer of retaining rings, wave springs, and hose clamps; and the only manufacturer to offer every ring style. With over 20,000 standard parts ready to ship and custom, Application Driven Solutions, we deliver the quality and reliability you can trust.

Small parts make a big difference, so choosing the right supplier isn't just important, it's essential. The wrong choice can lead to assembly failure or costly downtimes.



Don’t be fooled by companies and distributors claiming to manufacture. At Rotor Clip, we control every step – from raw material to finished product.

Vertical Integration

As the only manufacturer of all retaining ring styles (tapered/circlip, constant section/snap & spiral), wave springs and hose clamps, we offer tailored solutions, not one-size-fits all.

Product Range

Our engineers, metallurgists, and quality experts support your design process with application driven solutions, onsite training and accessible resources.

Engineering Support

We're certified to the toughest industry standards with in-house heat treating, CPQ systems, and full traceability – no mixed lots, ever.

ISO 9001 • ISO 14001 • IATF 16949 • AS9100 • ISO 13485

Quality Control

Rotor Clip parts are made in the USA and EU, with global warehouses and support teams to serve you wherever you are.

Global Production & Supply

We don’t just say we manufacture; we prove it. Open to audits and tours, Rotor Clip is built on transparency you can trust.

Transparency & Trust

We Work Global, We Work Local.
